## compact Snowcuber

mme

SNOCOM<sup>®</sup> snowharvestprofessionals

> Snocom developed the **Compact Snowcuber** to significantly reduce the volume of snow prior to loading, by compressing and expelling air from all types of snow. The machine enables precise and controlled loading into dump trucks, substantially reducing the number of truck movements required. Fewer truck operations translate into lower operational costs and a significant reduction in CO<sub>2</sub> emissions. Built with high-quality materials and featuring a unique, patented technology, this compact version offers a reliable, safe and efficient solution for snow removal.
